

**REMARKS**

The foregoing amendments to the specification insert a cross-reference to applicants' PCT and priority applications and correct obvious errors in the specification. The correction made in the paragraph beginning on page 32 is apparent from the specification as a whole, where the compounds are described for controlling pests. The correction made in the paragraph beginning on page 33 is apparent from the sense of the paragraph in which it occurs.

The foregoing amendments to the claims correct the definitions of X and Y to delete redundant double bonds and place the claims in better form for examination in the United States. European style "use" claims have been canceled or rewritten as method claims. New Claims 21-25 have been added. Claims 21-23 are drawn to a compound or salt of claim 1 wherein R<sup>4</sup> and/or R<sup>5</sup> have particular meanings encompassed by the broader claims. Claims 24 and 25 are drawn to a compound or salt of claim 1, having the specific structures shown in the Examples.

These amendments do not introduce new matter into the application.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
